SUMMARY

Robotics Engineer specializing in autonomous driving, multi-modal perception, and control systems. Experience developing real-time CV and control pipelines for autonomous trucks and robotics platforms, combined with leading small teams and driving end-to-end delivery of perception systems. Published at ICRA and IROS, with strong expertise in 3D object detection, sensor fusion, and MPC. Combines research and industry experience to build scalable, safety-critical autonomous solutions.

EDUCATION

Skoltech — 2023 – 2025
MSc in Robotics — Moscow, Russia

- GPA: 5.0/5.0
- Focus: Autonomous Driving, Multi-modal Perception, Deep Learning
- Research: 3D Object Detection using Vision Transformers and Sensor Fusion
- Publications: ICRA 2025, IROS 2025 (Autonomous Driving, 3D Detection)

Innopolis University — 2019 – 2023
BSc in Computer Science (Robotics) — Innopolis, Russia

- GPA: 4.6/5.0
- Thesis: Controller design for autonomous vehicles (MPC, CLF/CBF)

EXPERIENCE

Khalifa University – Team FlyEagle — 2024 – Present
Lead Computer Vision Engineer — Abu Dhabi, UAE

- Developed real-time 3D object detection algorithms for autonomous racing systems while leading a small CV team.
- Achieved **2nd place in A2RL Silver Race** under competitive, high-speed conditions.

168ROBOTICS — 2024 – Present
Researcher, Computer Vision — Moscow, Russia

- Improved multi-modal 3D object detection accuracy from **70% to 80%** using sensor fusion and deep learning.

Ozon Tech — 2021 – 2024
Software Engineer, Autonomous Driving — Innopolis, Russia

- Developed control systems for autonomous trucks in C/C++, contributing to deployment of **one of the first autonomous trucks in Europe**.

LANGUAGES

English (Advanced), **Russian** (Native)

SKILLS

C/C++, Python, ROS, PyTorch, Computer Vision, 3D Detection, Sensor Fusion, MPC, Autonomous Driving, Technical Leadership, Project Ownership, Cross-functional Collaboration
